To Whom It May Concern:

We have had an excellent working relationship with Triad Construction. We are happy with the results and quality of the workmanship. All of the contractors working with TRIAD team are very professional and punctual. Their work etiquette is paramount. I do not have to worry about the safety of my employees on site or the work area looking like a battlefield at the end of the day. They are very neat while completing their work. They do not leave tools lying in the hallways and they are always courteous to individuals who may pass by the work area. They get the work done and they don't hesitate to inquire if there is any inconsistency found in the drawings or with the project. I have not had any problems or issues with budget or micro managing the job. Their project managers and team remain very helpful throughout the entire process. I will not have anyone else complete my complicated work. We have hosted them for several projects large and small, which include SKIF space. I have worked with several other contractors doing the same scope of work over the years and have not been more impressed.

What I truly like is that they treat my job as their priority. It's refreshing to work with people who actually care and it shows! I would highly recommend them.

Sincerely,

Bonnie Bata
Facility Manager
